

DECK FILLER WITH ANGLED BODY

Short Description

The angled deck filler body is an integral part of deck fillers that enable installation near the hull of the boat.

Description

The deck filler body forms an integral part of deck fillers combined with the optional lid. Its angled dimensions help in installation close to the hull of the boat. It's compatible with multiple hose sizes.

- Available for Ø 38 and Ø 50 hose size
- To be completed with an optional deck filler lid
- Complies with standards: ISO 11192, ISO 9093-1, and ISO 8099:1997
- Made of acid-proof stainless steel (AISI316L)
